***GET STARTED TODAY!***

**Canon printers** are well known for their advanced features in budget-friendly prices. Canon printers are one of the most used printers across the globe. At [canon.com/ijsetup](http://canon.com/ijsetup) , you can get complete information regarding every model of Canon printers, scanners, and multi-function units. It gives you access to user manuals, Functions, Settings and a lot more.

## DOWNLOAD THE CANON PRINTER DRIVERS USING CANON.COM/IJSETUP

**To get started with canon printer the user need to download the driver software. Here is how to download the driver software easily:**

1. Set up the Canon printer and open a web browser on your computer device.
2. Visit [canon.com/ijsetup](https://www.canon.com/ijsetup) site and provide your Canon model number when asked.
3. You may also choose from bottom options and hit the “**click this link**” from the display.
4. Start downloading Canon drivers and software from the same [canon.com/ijsetup](https://www.canon.com/ijsetup).
5. Now, double click on the software and install for your Canon product.

## SETUP YOUR PRINTER || [CANON.COM/IJSETUP](https://www.canon.com/ijsetup)

1. You first have to complete the hardware configuration process for your computer before you do the setup.
2. Unbox your printer in the same way that you see in the printer video tutorial available on the web, [ij.start.canon](https://www.start.canon.com).
3. Connect your printer easily to the power supply via the power cable and turn on your printer.
4. You now have to save the printer's initial settings. This means that in the control panel, you have to set your preferences including language, date, place and time.
5. The video tutorial at [canon.com/ijsetup](https://www.canon.com/ijsetup) will lead you through the steps of loading the cartridge and closely following them with paper.

## HOW TO INSTALL CANON WIRELESS PRINTER WITH USB CONNECTION SETUP?

1. To setup Canon Printer first, locate and note down your Printer model.
2. Attach your Canon Printer to a computer thru USB cable connection.
3. It will automatically install the drivers but you need to connect with the wireless option so visit [canon.com/ijsetup](http://canon.com/ijsetup).
4. Now you have your Printer model number with you, enter here, and download the latest and updated Printer drivers.
5. Once download completed, open the Canon printer setup file.
6. Accept the license and agreement option and press next.
7. Now you need to select the wireless option with a USB connection.
8. After a few clicks, it will show you a list of available WIFI networks.
9. Select your WIFI network and enter the password to connect.
10. Once you see the connection successfully unplug the USB cable and test with test Print.
